PROFESSIONAL SUMMARY

Backend Developer with experience in developing and maintaining web systems using PHP and Laravel. Experienced in building RESTful APIs and GraphQL APIs for admin systems and Mobile applications. Participated in multiple real-world projects including outsourcing for Japanese clients (education association management, warehouse management) and domestic clients (e-commerce platforms, payment systems, order management).

Experienced with MySQL, Redis and data query optimization, while applying software design principles such as MVC, Service Repository Pattern, OOP and SOLID in system development.

EDUCATION

Engineer's Degree in Information Technology 2020 - 2024
Saigon University of Technology (STU)
Major in Information Technology

TECHNICAL SKILLS

Programming Languages:	PHP, TypeScript, JavaScript
Backend Frameworks:	Laravel, CodeIgniter
Frontend:	Blade Template, TailwindCSS, BootstrapCSS, Vue.js (Basic), React.js (Basic)
Databases:	MySQL, MariaDB, MongoDB
Caching:	Redis
API Development:	RESTful APIs, GraphQL
DevOps & Tools:	Git, Docker, Nginx, Composer, Postman, SourceTree, WinSCP
Cloud:	AWS (EC2, S3)
Platforms:	Linux
Architecture & Design Patterns:	MVC, Service Repository Pattern, OOP, SOLID Principles

WORK EXPERIENCE

Japanese Kindergarten Management System (Minpokyō)11/2024 – 05/2026

 10 members (1 PM, 9 Developers – 3 sources) minpo.or.jp

Comprehensive management system for Japanese kindergarten association, supporting member school management, training organization, career events and recruitment platform for students and kindergarten teachers.

3 main modules: Association & member school management (Laravel), Training & events system (Laravel), Job recruitment platform (Jobcube – PHP custom).

- Centralized management of legal entities, member schools, staff and operational data
- Digitized seminar/training workflows (registration, approval, QR Code attendance, materials, surveys)
- Supported large-scale recruitment events (Tokyo Hoikuen Fair) – booth management, candidates, interview scheduling
- Built recruitment platform for schools to post jobs and candidates to apply online

PHP

Laravel

MySQL

JavaScript

Order Management System – 3M Advertising Company09/2025 – 11/2025

 2 members (1 PM, 1 Developer)

Upgraded invoice management system into company and branch management system, enabling invoice management with department-based permission mechanisms.

- Developed and upgraded invoice management features
- Built department-based permission system
- Optimized data queries and business logic processing

Laravel

MySQL

JavaScript

E-commerce & Affiliate Platform – Lien Hoa Company

11/2025 – 05/2026

 4 members (1 PM, 3 Developers) aloo.asia

E-commerce platform built on Bagisto open-source core, extended with Affiliate Marketing system per client requirements.

- Developed Affiliate Marketing features
- Built commission calculation logic and affiliate campaign management
- Developed APIs and extension modules for the system
- Optimized data processing and system performance

Laravel

Vue.js

MySQL

Payment API – Uni-Taxi (Unipower Company)

01/2026 – 03/2026

 4 members (1 PM, 3 Developers)

Payment system for ride-hailing application, supporting transaction processing and real-time data synchronization between Admin system and Mobile apps (User & Driver).

- Developed GraphQL API for Admin system managing users, drivers and system data
- Built backend service for Mobile applications (User and Driver)
- Designed GraphQL schema and resolvers
- Handled business logic for payment features and data synchronization

TypeScript

MySQL

GraphQL

Warehouse Management System – TOLINEN (Japan)

10/2025 – 04/2026

 3 members (1 PM, 2 Developers)

Warehouse management system supporting businesses in tracking and managing import, export and inventory processes. The system helps manage product data, warehouse transaction history and supports controlling import/export operations.

- Maintained and upgraded system based on client requirements
- Developed and improved inventory management features for import, export and stock
- Optimized data queries and business logic processing
- Fixed bugs and improved system performance

CodeIgniter

MySQL

JavaScript

LANGUAGES

English — Reading - comprehension & Writing (Technical Documentation)

HOBBIES & PERSONALITY

♥ Badminton, Football, Street Workout

😊 Friendly, cheerful, approachable

STRENGTHS & ADVANTAGES

Responsibility — Committed to completing work with the highest quality

Fast Learner — Ability to adopt new technologies and apply them to real projects

Cross-cultural Teamwork — Experience collaborating with Japanese stakeholders and international teams

Outsource Experience — Experienced working as outsource with domestic and Japanese clients
